Automotive Wiring Harness

Reliable Connectivity for Modern Vehicles

Overview

WIPE hotwire Automotive Wiring Harnesses are engineered to deliver dependable electrical connectivity across passenger vehicles, commercial vehicles, and off-highway equipment. Designed for durability and long-term reliability, our harnesses support critical vehicle systems in demanding operating environments.

Key Features

- Custom-designed harness assemblies
- High reliability and long service life
- Heat, vibration, and abrasion resistant
- OEM-specific connector integration
- Precision manufacturing with stringent quality control
- Suitable for high-volume production

Applications

- Engine Harness
- Body Harness
- Door Harness
- Dashboard Harness
- Roof Harness
- Lighting Harness
- ABS Harness
- Fuel Pump Harness
- Sensor Harness
