Construction Equipment Harness

Engineered for Heavy-Duty Performance

Overview

WIPE hotwire Construction Equipment Harnesses are designed to perform reliably in demanding environments where heavy machinery operates under extreme mechanical and environmental stress. Built for durability, these harnesses ensure uninterrupted power and signal transmission.

Key Features

- Heavy-duty construction
- High flexibility
- Oil-resistant materials
- Abrasion-resistant design
- Weather-resistant performance
- High-current battery cable assemblies

Applications

- Construction Equipment
- Mining Equipment
- Material Handling Systems
- Earthmoving Machinery

Product Range

- Excavator Harness
- Backhoe Loader Harness
- Wheel Loader Harness
- Crane Harness
- Telehandler Harness
- Boom Lift Harness

WIPE hotwire
Precision Manufacturing for Global Possibilities
